(54) Title: FLUID DELIVERY SYSTEM WITH INTEGRATED LIGHT SOURCE

(57) Abstract: Fluid delivery system, in particular for showers, comprising: a first conduit (22) whose terminal section (20) flows into at least one outlet (26) for the delivery of a fluid jet in a preferential direction; a light source (52); and a second conduit (30) whose terminal section leads into at least one outlet (28) for the emission of a beam of light produced by the light source (52), and oriented essentially in parallel with the aforementioned preferential direction; characterised in that the terminal sections (20, 30) of the first and second conduits have at least one common wall (32) segregating the beam of light from the fluid, prior to its delivery.

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.
